NGUYEN NGUYEN

3RD YEAR INFORMATION AND TECHNOLOGY STUDENT EMBEDDED SYSTEM SOFTWARE DEVELOPMENT

RELEVANT SKILLS:

Fundamental skills

- Electronics, Digital Electronics and Physics
- Microcontroller programming
- Network security
- Web development.

Software skills

- C, C++
- Python
- Java
- JavaScript, TypeScript.
- Linux, Bash Scripting
- PCB design and KiCad
- LTspice, QSpice Simulator

Hardware skills

- Arduino
- STM32
- Oscilloscope

LANGUAGES:

- Vietnamese: Native
- English: Fluent
- Finnish: Beginner

EDUCATION

- **Bachelor of Engineering, Information Technology - Embedded systems - Software development**
  Institution: Vaasa University of Applied Science (VAMK)
  Year: 2023 - now
- **Codecademy** - Year: 2023 - now
- **Udemy** - Year: 2024 - now
- **Cisco Networking Academy** - Year: 2025 -now

PROJECTS

Web development:

- **Portfolio Website:** Built using JavaScript with React and React Router; hosted on Netlify.
- **Mini-Reddit Web Application**: A web application using the Reddit API, developed with React and Redux.
- **Weather forecast**: Developed with vanilla JavaScript, integrating the OpenWeather and Google Places API.

Electronic design:

- **Temperature monitoring system:** A remote temperature measurement system involving analog circuit design, LTspice simulation, and microcontroller programming on the STM32 L152RE using the SPI interface.

CERTIFICATIONS

Microsoft Certified - Azure Fundamentals AZ-900 - 2024

Udemy - ARM Cortex-M7 STM32F7 Bare-Metal Programming From Ground Up - 2024
