

NGUYEN NGUYEN

2ND YEAR INFORMATION AND
TECHNOLOGY STUDENT
EMBEDDED SYSTEM
SOFTWARE DEVELOPMENT

RELEVANT SKILLS:

Fundamental skills

- Electronics, Digital Electronics and Physics
- Data Structures and Algorithms
- Local Area Network

Software skills

- C, C++
- Python
- Java
- Javascript, with libraries React, React Router and Redux.
- TypeScript
- Linux, Bash Scripting
- PCB design and KiCad

Hardware skills

- Arduino
- STM32

LANGUAGES:

- Vietnamese: Native
- English: Fluent
- Finnish: Beginner

EDUCATION

- **Bachelor of Engineering, Information Technology - Embedded systems - Software development**
Institution: Vaasa University of Applied Science (VAMK)
Year: 2023 - now
- **Codecademy - Online learning platform for programming**
Year: 2023 - now
- **Udemy - Online learning platform**
Year: 2024 - now

PROJECTS

Web development:

- **Portfolio Website:** Javascript with React and React Router libraries. Hosted on Netlify.
- **Mini-Reddit Web Application:** Web application with Reddit API, using libraries React and Redux.
- **Weather forecast:** Vanilla JavaScript, using OpenWeather API and Google Places API.
- **Memory game:** A brain game using HTML, Javascript and CSS.

Arduino:

- **Temperature transmitter and receiver:** A simple temperature sensor receiving system is created and displayed via a 7-segment LED display.

CERTIFICATIONS

Microsoft Certified - Azure Fundamentals AZ-900 - 2024

Udemy - ARM Cortex-M7 STM32F7 Bare-Metal Programming From Ground Up - 2024
